***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) s 1-6, drawn to a composition and product and method making the same.

Group II, claim(s) 7-8, drawn to an apparatus for depositing a film.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. The only things shared between the method/product claims and the apparatus are (i) the mention of cyclosiloxane and linear siloxane precursors and (ii) the premise that the method is a CVD method and the apparatus is a CVD apparatus. Nevertheless, Applicant is advised that the so-called gas supplying units "for supplying a plurality of organosiloxane monomer gases" would have to be, for the purpose of evaluating the claims against the prior art, treated simply as supplying units for any gas whatsoever. That is to say, though it might be Applicant's intent to use the claimed apparatus for the creation of specific films, the claims are still directed to an apparatus where the constitution of the gases used is not material to patentability. (The phrase "for depositing an organopolysiloxane copolymer film" is, likewise, a statement of intended use and, hence, is not assigned patentable weight.) Given that the aforementioned passages are not assessed patentable weight, claims 7 and 8 are directed to a completely unrelated invention thus their separation from claims 1-6 is appropriate.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
